ARNOplast

INNOVATIVE SYSTEMS

GARDEN

ARNOplast

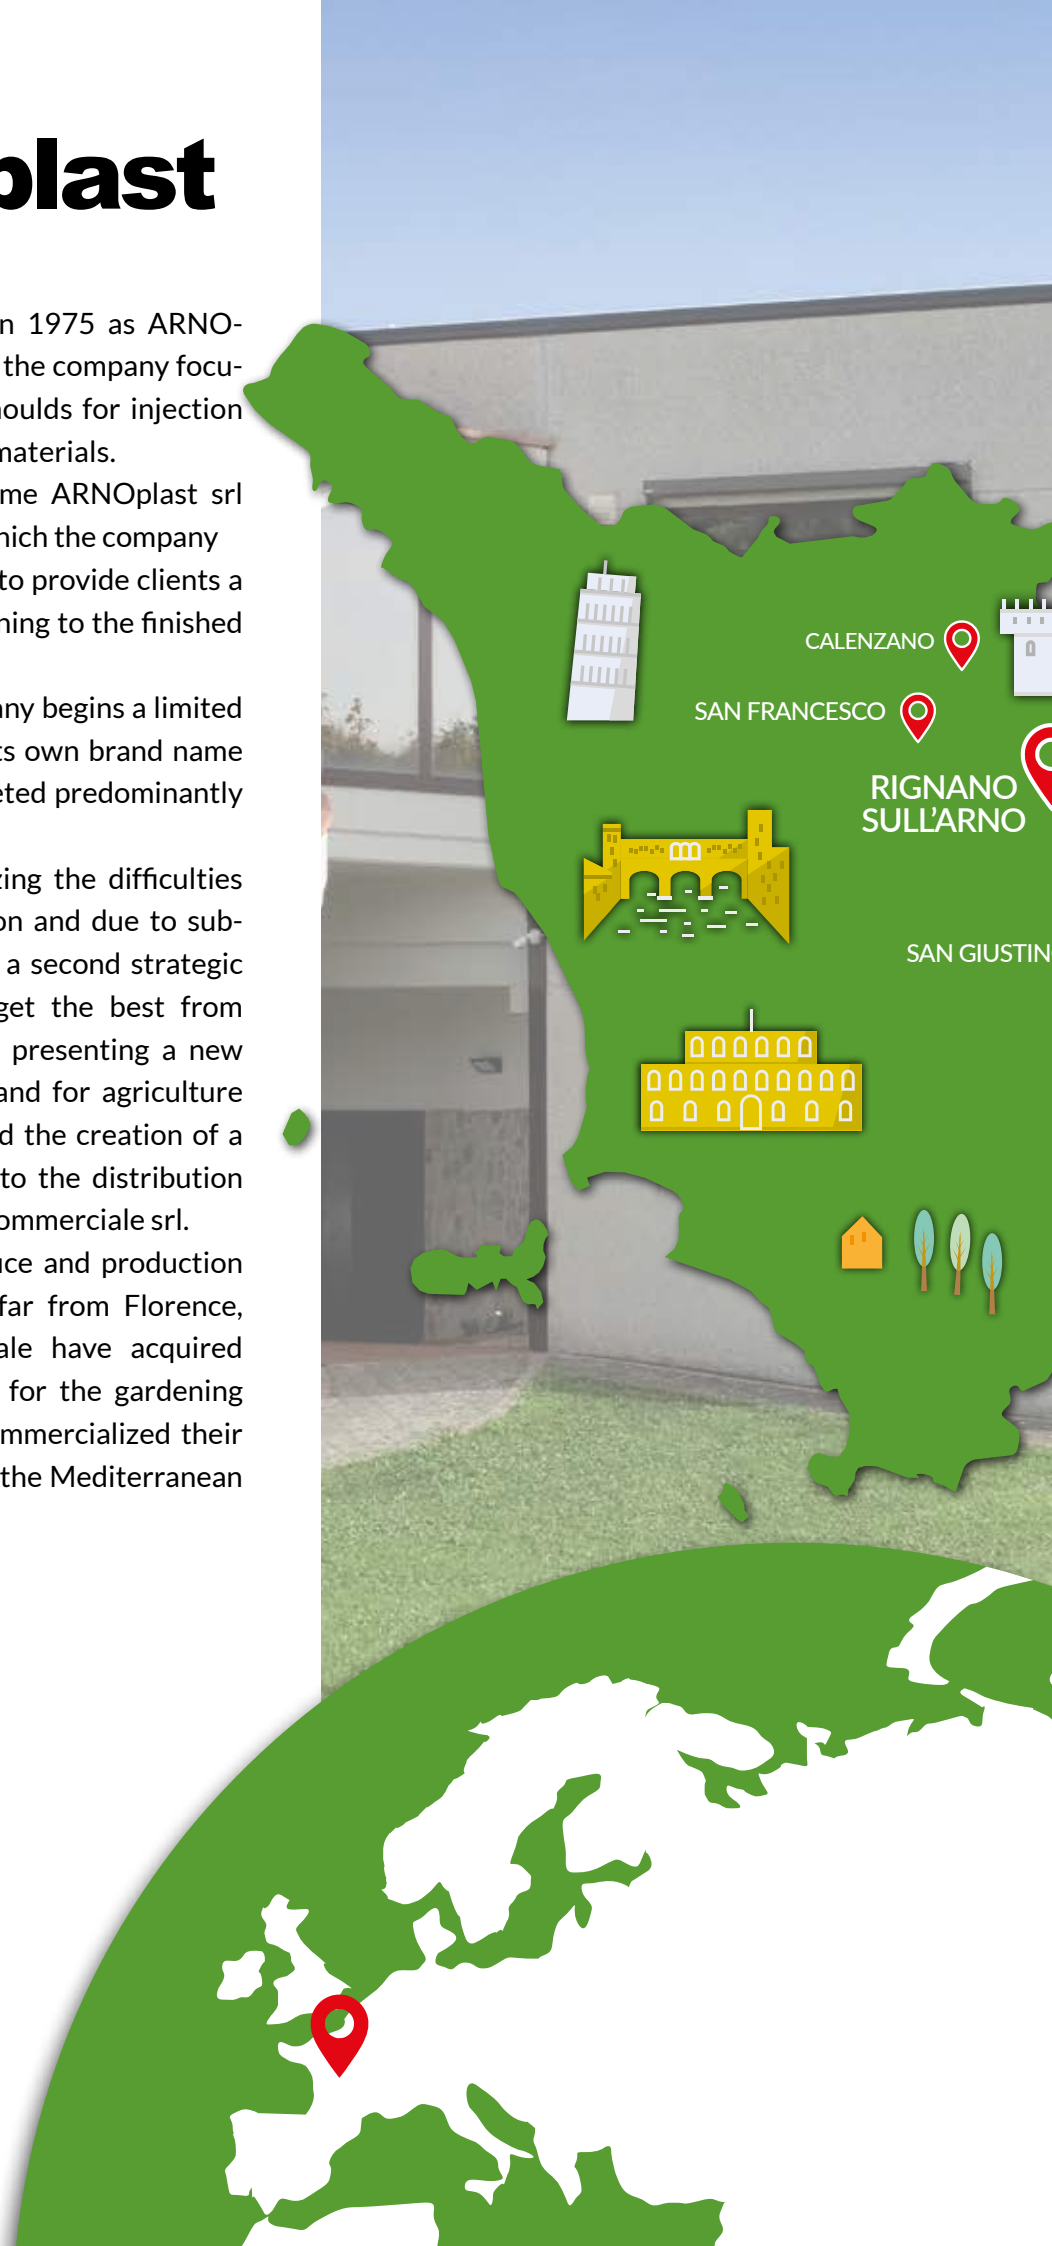

The company was established in 1975 as ARNO-stampi sdf. During the first years the company focused on designing and building moulds for injection moulding and blowing of plastic materials.

In 1983 the new company's name ARNOplast srl marks the first strategic layout which the company implements with the willingness to provide clients a complete service, from the designing to the finished product.

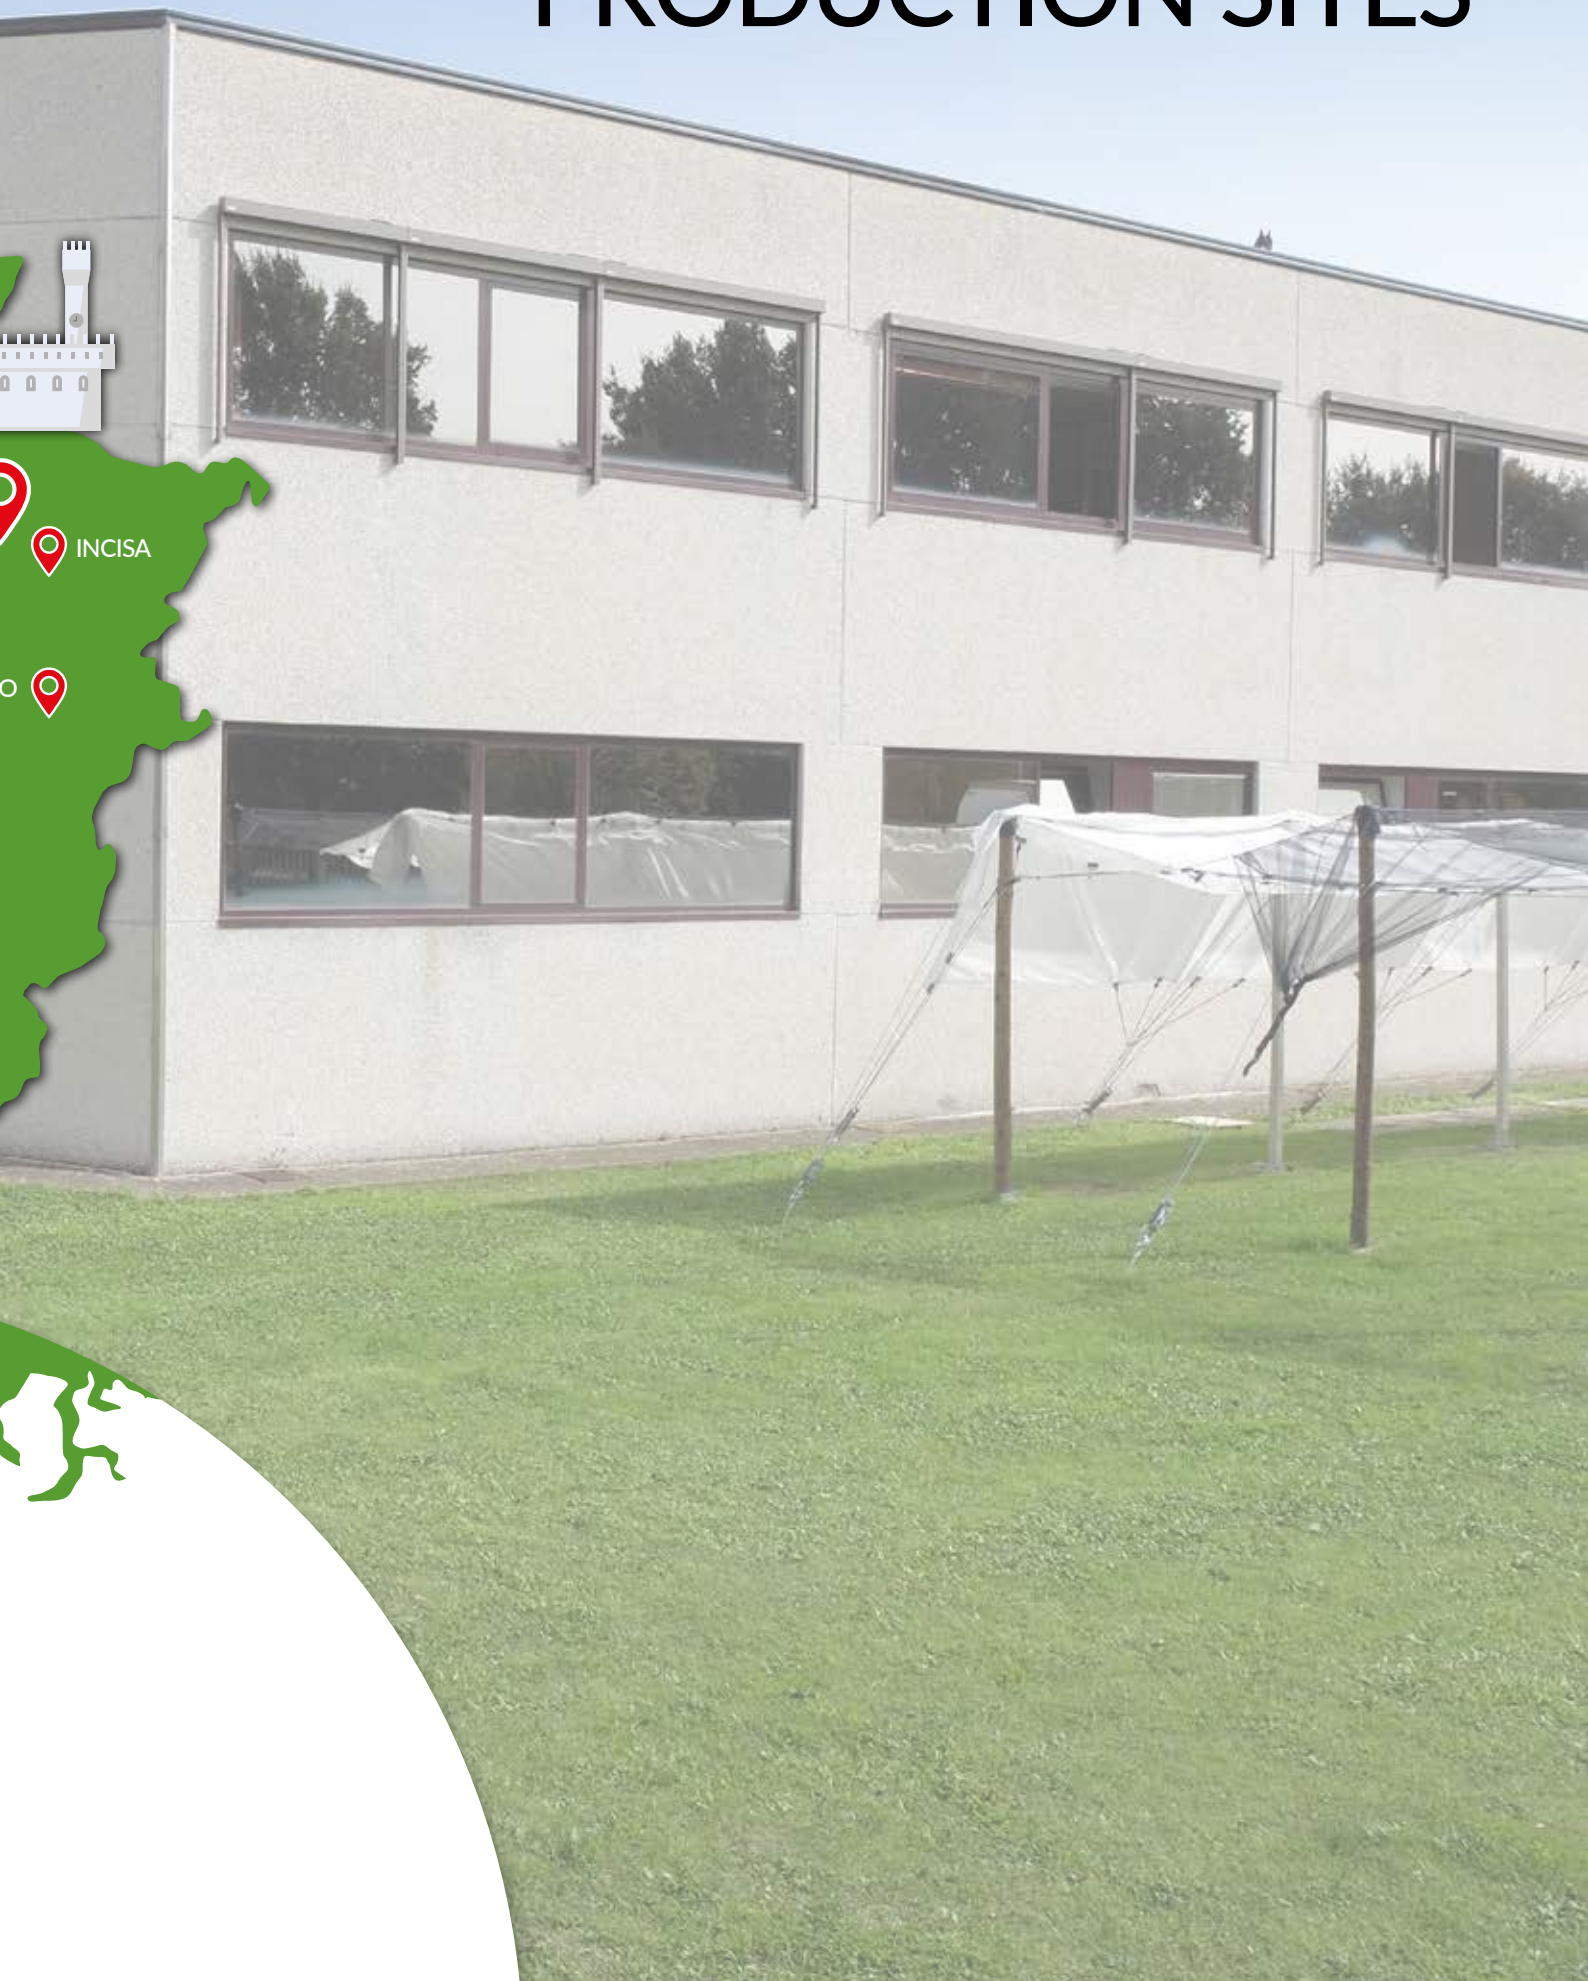

Also in the mid 1980's the company begins a limited production of accessories with its own brand name for professional agriculture targeted predominantly to Southern Italy's markets.

At the end of the 1990's, realizing the difficulties it would encounter from there on and due to sub-supply, the company carried out a second strategic turning point and decided to get the best from their own innovative capacities, presenting a new range of products with their brand for agriculture and gardening; also in this period the creation of a Company dedicated exclusively to the distribution process was created, the ARNOcommerciale srl.

Today ARNOplast with head office and production plant in Rignano sull'Arno not far from Florence, together with ARNOcommerciale have acquired a position in the Italian market for the gardening agriculture systems and have commercialized their own products in all of Europe, in the Mediterranean area and in overseas countries.

HEADS FOR BRUSHCUTTER

TAP ‘N GO HEAD “SIRIO”

PA

FEATURES

- The innovative open-close head-mount bayonet fastening (patent pending) facilitates the replacement of the wire
- Compact, robust and very handy
- Weight approx 350 gr. with wire - Ø 115 mm
- The innovative locking system gives the product a very ease of use and robustness to the end of its useful life
- Made of special plastic material resistant
- Available with universal insert or threaded insert
- Contains less than 8 meters of wire ø 2.4 mm
- Supports wires up to ø 3.3 mm

COD. EAN	ART.	DESCRIPTION	BOX

TAP ‘N GO HEAD “STILO”

PA

FEATURES

- Very high resistance to shock
- Excellent shock resistance
- Bayonet fastening
- Practical and easy replacement of the monofilament
- Available with universal insert or threaded insert
- Supports up to 4.0 mm wire
- Extremely economical
- Weight approx 520 grams with wire - Ø 137 mm
- The inner spool can hold 10 meters of wire ø 2.7 mm

ALUMINIUM TAP ‘N GO HEAD

AL

FEATURES

- Excellent shock resistance
- No distortion from overheating
- Perfect balancing in high-speed rotation. The innovative opening-closing head with bayonet fastening (patent pending) facilitates the replacement of the wire
- Control knob mounted IDLE CUP
- Weight approx 800 grams with wire. - Ø 145 mm
- Support up to 4 mm wire
- Reel capacity: Wire ø 3.0 -> 8 m
- Increased maneuverability, less wear of the reel in contact with the ground
- Great robustness
- Dissipation of heat during the work
- Perfect balance
